Machine Learning and Artificial Intelligence are creating a huge buzz worldwide. The plethora of applications in Artificial Intelligence has changed the face of technology. The terms Machine Learning and Artificial Intelligence are often used interchangeably. However, there is a stark difference between the two that is still unknown to the industry professionals.

Machine learning is a subset of AI that involves the development of algorithms and statistical models that enable computers to learn and make predictions or decisions without being explicitly programmed. Machine learning algorithms can be trained on data to identify patterns and make predictions about future events.

How this Course will be Delivered?
